PROFESSIONAL SUMMARY

Aspiring Data Analyst proficient in Python, SQL, and Power BI, with hands-on project experience. Applied data analysis, statistical techniques, and visualization tools to uncover insights from large datasets. Developed dashboards and analytical solutions that supported data-driven decision-making and business performance.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Jun 2022 - May 2026

Swami Vivekananda University, Barrackpore — CGPA: 7.9/10.0

Higher Secondary (HS) Examination

2020 - 2022

Tikrapara A. M. High School, Medinipur — Marks: 92 %

SELECTED PROJECTS

Social Media Impact Analysis with Python, PostgreSQL & Power BI 🔗 |

2026

- Analyzed **464K+ records** across **98 countries** using **Python** for behavioural and mental health analysis.
- Developed **20+ PostgreSQL business queries** using **CTEs & window functions** for analytical reporting.
- Built **interactive Power BI dashboards** with **KPIs, DAX**, and dynamic business visualizations.

Flipkart Sales Hub: End-to-End ETL & BI Pipeline 🔗 | 2026

- Engineered an automated ETL pipeline using **Python & PostgreSQL** to process **80K+ records** efficiently.
- Leveraged **SQL window functions** to analyze seller performance and **supply chain efficiency metrics**.
- Built Power BI dashboards optimizing stock-to-sales ratios, capital recovery workflows & operational efficiency.

Large-Scale Apple Retail Sales Analysis with SQL 🔗 | PostgreSQL

2026

- **Optimized Apple sales queries** for millions of records using **advanced indexing** and **Explain Analyze**.
- **Engineered complex queries** to track **Apple's year-over-year growth** and store-level performance KPIs.
- Derived **actionable insights** from Apple **warranty trends** & product launch sales performance using CTEs.

Samsung Global Supply Chain & Logistics Performance Architecture 🔗 |

2026

- Developed **interactive Power BI dashboards** to visualize **Samsung logistics & distribution performance**.
- Applied **DAX formulas** to analyze **complex shipping datasets** & identify critical **supply chain delays**.
- Created automated **Power BI reports** providing **real-time insights** for critical executive logistics decisions.

Bank Transaction Fraud Analysis with Python & Statistical Testing 🔗 |

2026

- Analyzed **1M banking transactions** using **Python, EDA & statistical technique** to uncover fraud patterns.
- Applied **hypothesis testing & correlation analysis** to identify significant fraud indicators & risk factors.
- Developed visualizations and insights supporting **fraud detection and financial risk assessment**.

TECHNICAL SKILLS

- **Programming & Data Analysis:** Python (Pandas, NumPy), Web Scraping (Selenium), Statistics, SciPy, EDA.
- **Database Systems:** SQL (MySQL, PostgreSQL), Joins & Subqueries, CTEs, Window Functions, Data Validation.
- **BI & Visualization:** Power BI (Interactive Dashboards, KPI Tracking, DAX Formula), Matplotlib, Seaborn.
- **Tools & Productivity:** Excel (Pivot Tables, VLOOKUP, XLOOKUP), Google Sheets, Jupyter Notebooks, GitHub.
- **Soft Skills:** Analytical Thinking, Problem Solving, Stakeholder Communication, Data Storytelling, Teamwork.

CERTIFICATIONS

- **Data Analysis with Python** 🔗 | IBM
- **SQL (Intermediate)** 🔗 | HackerRank
- **Data Visualization with Python** 🔗 | IBM
- **Python for Beginners** 🔗 | MySirG.com
